ADVANCED DATA SCIENCE (ADS)

End-Term Project: Pre-Submission Summary and Viva Guidelines

Weightage	Viva dates	Bring
10%	23 October 2026: ADS2 26 October 2026: ADS1	One printed page per group

What your one-page summary must include

1. **Project and group:** Project title, group number, names and student IDs.
2. **Stakeholder and problem:** Who needs the analysis, what problem they face, and why it matters.
3. **Research questions and hypotheses:** State the key question(s) and initial testable hypothesis/hypotheses.
4. **Data sources:** Source names/links, time coverage, expected rows, key variables, and data-quality/access constraints.
5. **Integration plan (SSOT):** Explain how sources will be combined; mention join keys, duplicates, missing values, units and quality checks.
6. **Methods and BADIR workflow:** Outline the planned analysis using methods prescribed in the ADS course handout.
7. **Validation and decision value:** Explain how hypotheses will be assessed and how findings could inform a decision.
8. **Limitations and next steps:** Note assumptions, constraints, milestones and any deviation needing instructor approval.

Viva and assessment

1. Every member must understand the problem, stakeholder, hypotheses, data sources, integration plan and methodology.
2. Be ready to explain your individual contribution, data suitability, assumptions, limitations and next steps.
3. Marks are based on the group submission and individual viva performance.

Important: Attend during your scheduled lab session and bring the one-page printed summary. No makeup viva will be conducted.
